Fig 5 Distinct and clean in one operation. Remove all temporary cement etc., before permanent cementation.

Fig 4 Express Consepsis Scrub directly from syringe onto tooth with a White Mac tip or into rubber cup with or without tip.

**Procedure:**

- Before definitive cementation, thoroughly clean preparation with Consepsis Scrub. We recommend using Ultradent StarBrushes with Consepsis Scrub for cleaning deep grooves on tooth surfaces.
- Deliver Consepsis Scrub directly to prophyl cup from syringe through a White Mac tip or directly to the preparation. Note

*Note: If patient is not anesthetized, hold the syringe of Consepsis Scrub under hot tap water for 10 seconds to bring the disinfectant closer to body temperature.*

- Cement crown, inlay, etc., onto rinsed preparation following removal of excess water. Take care to prevent salivary contamination before cementation.

**Treatment Notes:**

For composite and amalgam preparations, etc., treat surfaces the same as for temporary crown cementation. Place appropriate dentin liner and/or base as needed (we recommend Ultra-Blend® plus™).

**Precautions:**

- Tips are disposable; do not reuse.
- Do NOT allow volumes of material to be ingested. Collect extraneous material with proper vacuuming techniques.
- DO NOT use on patients with known sensitivity to chlorhexidine.
- Use Ultradent® Syringe Covers sealed with the Ultradent® Impulse Sealer for a protective barrier to prevent cross-contamination.

### Consepsis® Scrub

Chlorhexidine Antibacterial Slurry

#### Description:

**Consepsis® Scrub** is a lightly flavored 2.0% (relative to liquid component) chlorhexidine gluconate disinfecting scrub.

#### Indications:

Consepsis Scrub is used for removal of residual temporary cement prior to permanent cementation and/or for cleaning debris while disinfecting.

#### Pre-Treatment Procedure:

##### A. Using 1.2ml prefilled syringes:

- Remove luer lock cap from syringe.
- Twist disposable tip firmly onto syringe:

Fig. 1 Hold plunger in palm of hand for optimum control.

- For optimum control, hold syringe in palm of hand rather than in conventional manner with thumb on plunger (see Fig. 1).

##### B. Using 30ml IndiSpense® System:

- A pre-labeled unit dose syringe is attached to the end of the large, no-waste, IndiSpense syringe by turning the luer lock of the unit dose syringe snugly onto the male thread of the IndiSpense (see Fig. 2).
- With the palm grasp (Fig. 3) the plunger of the IndiSpense syringe is depressed while the unit dose syringe is stabilized at the plunger with the nondominant hand. To prevent cross-contamination, a used syringe should not be reattached to the IndiSpense syringe. Do not express contents of unit dose syringe back into IndiSpense.
- If not using the preloaded syringe immediately, replace luer lock cap until ready for use.

Fig. 2 & 3 A 1.2ml unit dose syringe is twisted firmly onto the IndiSpense syringe. Slightly depress plunger of IndiSpense and fill unit dose syringe to desired level.

Ultradent syringes have an expiration date stamped on the side of the syringe consisting of one letter and three numbers. The letter is a lot number used for manufacturing purposes and the three numbers are the expiration date. The first two numbers are the month, and the third number is the last number of the year.

## English General Precautions:

1. For Professional use only.
2. Review instructions, precautions, and MSDS before beginning treatment. Use only as directed.
3. Keep products out of heat/sunlight.
4. Avoid skin exposure to resins.
5. Isolate strong chemicals to area of treatment.
6. Confirm that patient has no known allergies to treatment materials.
7. Test flow of materials from syringe and tip before using intraorally.
8. Never force syringe plungers.
9. Use Ultradent® Syringe Covers and/or clean and disinfect syringes between patient.
10. Use standard curing lights with all light polymerized/activated materials.

## German Allgemeine Vorsichtsmaßnahmen:

1. Nur für professionellen zahnmedizinischen Gebrauch.
2. Lesen Sie die Gebrauchsinformationen und Warnhinweise sorgfältig, bevor Sie die Behandlung beginnen. Verwenden Sie die Materialien nur gemäß Vorschrift.
3. Schützen Sie die Produkte vor Hitze und direktem Sonnenlicht.
4. Vermeiden Sie Hautkontakt mit Kunststoff-Materialien.
5. Beschränken Sie den Einfluß stark wirkender Agenzien auf das Behandlungsgebiet.
6. Fragen Sie den Patient nach bekannten Allergien auf die zur Behandlung verwendeten Materialien.
7. Prüfen Sie den Fluss des Materials aus der Spritze und durch den Spritzenansatz, bevor Sie intraoral applizieren.
8. Drücken Sie einen Spritzenstempel nie mit Gewalt ein.
9. Verwenden Sie Ultradent®-Spritzenhüllen und/oder reinigen und desinfizieren Sie die Spritzen nach jedem Patienten.
10. Verwenden Sie für Materialien, die durch Licht zu polymerisieren bzw. zu aktivieren sind, die üblichen Polymerisationslampen.

## French Précautions générales:

1. Exclusivement réservé à l'usage professionnel.
2. Voir les instructions, les précautions et la notice de sécurité avant le traitement. Utiliser uniquement selon les instructions.

5. Limiter l'application des produits aux seules zones de traitement.
6. S'assurer que le patient ne présente aucune allergie aux produits utilisés lors du traitement.
7. Tester le débit des matériaux à travers les seringues et les embouts d'application avant toute utilisation intra-buccale.
8. Ne jamais forcer sur le piston des seringues.
9. Utiliser les couvre-seringues Ultradent® et/ou nettoyer et désinfecter les seringues après utilisation.
10. Utiliser une lampe à photopolymériser standard avec les matériaux photopolymérisables ou photoactivables.

## Dutch Algemene voorzorgsmaatregelen:

1. Uitsluitend bestemd voor aflevering aan een toepassing door tandartsen.
2. Raadpleeg gebruiksaanwijzingen en houd rekening met de daarin genoemde aanbevelingen. Gebruik alleen zoals is beschreven.
3. Bewaar de producten koel en donker.
4. Vermijd huidcontact met harsen.
5. Appliceer alleen daar waar nodig.
6. Overtuig u ervan dat de patiënt niet allergisch is voor de toegepaste materialen.
7. Test het functioneren van spuitjes alvorens intra-oraal te gebruiken.
8. Oefen nooit overmatige kracht uit bij de spuitjes.
9. Gebruik Ultradent® Syringe Covers en/of schone spuitjes bij elke patiënt.
10. Gebruik steeds geteste lichtuithardingsapparaten.

## Italian Precauzioni Generali:

1. Prodotto riservato all'uso professionale.
2. Prima di iniziare il trattamento vanno esaminate le istruzioni, le precauzioni d'uso ed i moduli per la sicurezza dei prodotti (MSDS). Utilizzare esclusivamente nei modi indicati.
3. Conservare i prodotti al riparo dal calore e dall'esposizione diretta alla luce del sole.
4. Evitare l'esposizione della pelle alle resine.
5. La presenza di prodotti chimici forti deve essere isolata all'area di trattamento.
6. Verificare che il paziente non sia allergico ai prodotti scelti per il trattamento.
7. Prima dell'uso intraorale deve essere verificato il flusso del materiale dalla siringa e dalla punta.
8. Non forzare mai gli stantuffi delle siringhe.
9. Usare le guaine Ultradent® Syringe Covers e/o pulire e disinfettare le siringhe dopo ciascun paziente.
10. Utilizzare lampade polimerizzatrici convenzionali per tutti i materiali fotopolimerizzabili e fotoattivi.

## Spanish Precauciones Generales:

1. Para uso exclusivo de Profesionales.
2. Antes de empezar el tratamiento, revise las instrucciones, precauciones y el MSDS. Siga las instrucciones.
3. Siempre mantenga los productos alejados del calor y de la luz solar.
4. Evite el contacto de los resinas con la piel.
